(54) Title: METHOD AND APPARATUS OF ATTACHMENT OF INFORMATION

(57) Abstract: The present invention provides a method and an apparatus for attaching information, which edits a parameter of the information to be attached and a parameter of the corresponding specific content into a synchronous playing file using a mark language. When played subsequently, the playing apparatus plays (HTMC, XML, SMIL) the attached information and the specific content according to the instructions from the synchronous playing file to realize the effect of synchronously multimedia playing the specific content and the attached information.
